

Alexei Solntsev

Education - Computer Scientist-economist
Profession - Technical Writer

Work experience — 12 years

<https://github.com/lejbron>

mordor@internet.ru

Advantages

I write texts that **solve** business problems and **help** the target audience.

Technical writer turned documentation leader with 12 years of experience across *cybersecurity, big tech, and government IT*. I work where complexity meets communication — turning technical depth into texts that actually gets used. Today, at the IT Department of Moscow, I design documentation workflows and develop the people who run them. Writing it's not just a job, it's more of a passion.

Commercial activities

April 2025 — present

Head of the Competence Center for the Preparation of Technical Documentation

Tasks

- **Designing BPMN workflows** and **contributing to the implementation** of standards for technical documentation
- **Coordinating a team of technical writers**, overseeing content quality, task distribution, and delivery timelines.
- **Managing preparation** of accounting and compliance documentation for government contracts, ensuring accuracy and adherence to regulatory requirements.
- **Improving documentation capabilities** within the team, supporting skill development and raising overall content quality standards.

MTS, Innovation Unit

Information technology, system integration, Internet

March 2024 — March 2025 (1 year)

Head of the Technical Writers Group

Tasks

- **Managed the internal product knowledge base** in *Confluence*, ensuring documentation consistency and accessibility across teams.
- **Prepared and published product release notes**, communicating key updates, fixes, and feature changes to stakeholders.
- **Prepared certification documentation** in compliance with internal and regulatory requirements.
- **Coordinated external documentation vendors and contributors**, ensuring delivery quality and adherence to project standards.
- **Contributed to the development** of an LLM- and GraphRAG-based tool, supporting AI-driven knowledge retrieval and information processing.

Information Security
June 2022 — February 2024 (1 year 9 months)
Leader of the Technical communications team

Tasks

- **Implemented an open-source tool** to replace a complex internal solution, reducing development overhead and simplifying maintenance.
- **Coordinated task tracking** across four systems, including *JIRA* and *GitLab*, improving workflow visibility and cross-team alignment.
- **Contributed to the implementation** of the *RASCI responsibility model*, clarifying ownership and improving accountability within the team.
- **Improved efficiency** of the technical communications team, enhancing delivery speed and documentation quality.

Digital Services
december 2018 — May 2022 (3 years 6 months) **Leading Technical Writer**

Tasks

- Implemented **Swagger-based API documentation** for internal services, reducing onboarding time for QA engineers by 30%.
- **Documented core functionality** of the *VKontakte Ads* service, translating technical processes into structured product documentation.
- **Developed and standardized** a project documentation **style guide** to ensure consistency across technical materials.
- **Maintained and structured the team knowledge base** in *Confluence*, improving information accessibility and collaboration efficiency.
- **Automated documentation deployment workflows** using *Jenkins*, enabling continuous updates of the documentation website.

Career Start

Information Technology
february 2016 — November 2018 (2 years 10 months) **Senior Engineer**

Tasks

- **Implemented Oracle Identity Management solutions** in two banks, supporting internal information security processes.
- **Prepared technical documentation**, including user guides, operational manuals, and supporting materials.
- **Developed role-based access control (RBAC)** models for multiple bank divisions.
- **Prepared training materials** and **conducted user training sessions** on Oracle IDM for bank employees.
- **Developed connectors in Java** for system integration and identity synchronization.

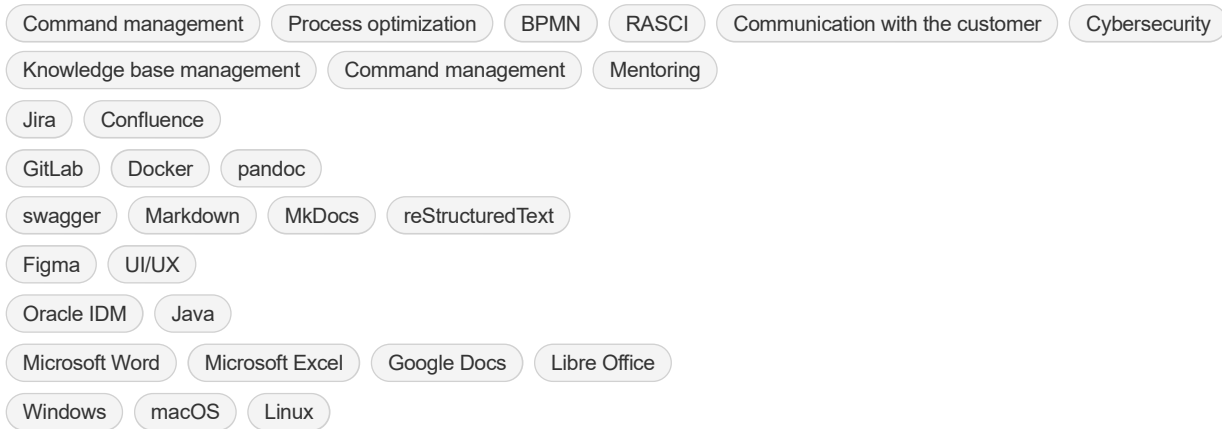

Banking sector
jul 2012 — June 2014 (2 years) **Specialist of the Department of Operational Control, Information Security and tracking of suspicious transactions**

Tasks

- **Analyzed** bank applications logs **for information security policy violations**, identifying and documenting compliance issues.
- **Coordinated** with the Kazakhstan branch during verification of regional financial reporting, **supporting cross-office communication** and **audit** processes.
- **Developed an Excel-based tracking system** for monitoring regular employee compliance checks.
- **Tested system migration** to the unified *Rainbow* information platform, validating functionality and data transfer processes.

Skills

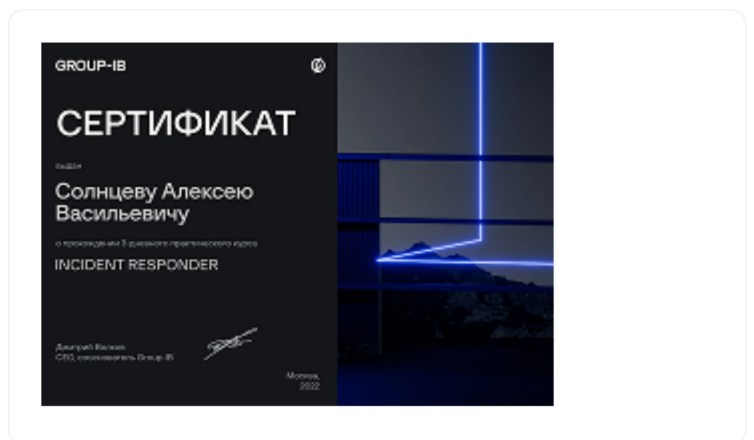

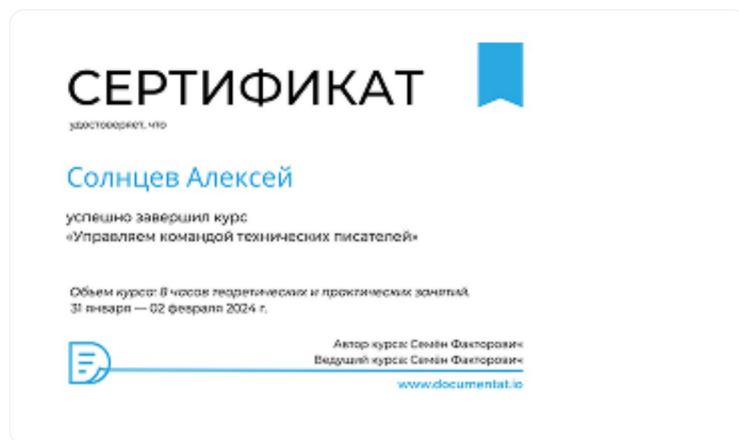

Knowledge of languages

- Russian is Native
- English — C1 — Advanced
